100,000
RADIOGRAPHERS

AND

8,000
STUDENTS

ACROSS EUROPE

38 National Societies/Professional Bodies
49 Academic Institutions: Radiography Education

"The role of the European Federation of Radiographer Societies (EFRS) is to represent, promote and develop the profession of radiography in Europe, within the whole range of medical imaging, nuclear medicine and radiotherapy and moreover everything that is directly or indirectly related or beneficial to this role, everything in the broadest meaning".

Founded in 2008 by 27 professional societies of radiographers, prior to which many European radiographer societies had been meeting and cooperating since the 1950s fifties under the umbrella of the ISRRT.

In 2015, 38 radiographer societies from 32 countries are full members and 49 educational institutions from 25 countries and one trade union are affiliate members.

The EFRS Board is managed by an Executive Board charged with the day to day management of the Federation, supported by an Advisory Board and Educational Wing Management Team.
